Advantages

- All stainless steel knife-peeling machine for peeling potatoes, root celery, kohlrabi etc. which will give the product a “hand-peeled” look.
- Due to the exact adjustment of the knives and the hygienic rubber skin inside the drum, the end product is beautifully and smoothly peeled, with a minimum of peel losses and bruises.
- Removable peeling disc with 15 long and 15 short peeling knives. The peeling disc is made of stainless steel with milled knife cavities. On the peeling disc are three very solid turning-rubbers which turn the product during the rotating action of the peeling disc.

[Product demonstration video of the CSM-20 / MSM-20](#)

- The construction is compact and has a motor which is completely inside the machine. The legs make it possible to clean the floor underneath the machine. The dismountable legs can be sized conform your preferences, before delivery of the machine.
- Exceptionally nice and solid finish. Containing a plastic electrical enclosure within a stainless steel enclosure, thus optimally protected against water.
- Complies with the latest safety standards of machinery. Containing a secured cover and emergency stop relay.
- Can be used in an automatic processing line with an optional pneumatic operation of the door

Optional

Peel and Waste Collection Trolley

This collection trolley is ideal to collect all peel and waste while at the same providing drainage for water. The trolley has a perforated insert bin which can easily be removed to throw out the waste product. Because of the four castors underneath the trolley, it can be quickly be placed underneath the peeling machine as well as be removed from underneath the peeler.

Extra Stainless Steel Knife Peeling Disc

One knife peeling disc is standard included with the purchase of the MSM-20 knife peeling machine. With extra knife peeling disc, down time can be reduced by always having a knife peeling disc at hand with sharp knives.

Technical data

Electrical data	3 Ph / 400 V / 50 Hz / 2.7 A*
RPM peeling disc	208 rpm
Power	1.1 kW
Dimensions	595 x 750 x 1050 mm
Entrance height	990 mm
Exit height	500 mm
Content	15 – 20 kg per cycle
Cycle time	1 – 5 min
Weight	125 kg

*The MSM-20 is electrically adaptable ensuring its compatibility with local power requirements.
